We're offering more ways to connect for your care

Dear [First Name],

It's important to see your doctor when you have an acute health need, and also to check in regularly to stay on track with your ongoing health conditions. That's why we offer telehealth visits, connecting you with your doctors via desktop phone, mobile phone, tablet or laptop.

While we like to see you in person, we can still help you manage chronic conditions or treat acute issues through a telephone call or video chat. You'll get the same high-quality, quality care you've come to trust from our office—from the comfort and safety of home.

A telehealth visit is a safe and easy way to stay connected with us, helping to ensure your health remains a top priority. We look forward to helping you manage your health in a telehealth visit soon.

Sincerely,  
**SIGNATURE**  
<Provider name>  
<Provider title>

Many health plans are covering telehealth visits, but please check with your plan for specifics on your benefit coverage and what medical necessity rules apply.

## The Office Flyer document – version 2

Using Adobe Acrobat, open the TelehealthFlyer2.pdf file – version 2 if you opt for this version the customization is needed

You have 4 areas that you can customize in the document as noted below

When you have entered all of your content updates, save the file for use

**PROVIDER LOGO**

You delete the place holder for your logo and can insert a .jpg of your logo here to customize the document.

It's important to see your doctor when you have an acute health condition just to stay on track with managing your ongoing conditions. That's why we offer telehealth services to help you connect with your doctor.

At home, on your phone, or in our office, we can still help you manage chronic conditions or treat common non-emergency needs through a telehealth visit or chat. You'll get the same individualized, quality care you've come to trust from our office...from the comfort and safety of home.

A telehealth visit is a secure, convenient way to help connect with us, helping to ensure your health receives a top priority.

Now it's a great time to start using telehealth visits. Here's what you need to do to get started:

Call us at 1-800-400-XXXX (TTY), Monday through Friday, 9:00 AM - 7:00 PM, local time.

You can replace the filler contact information for your office

If you have an ACA 1557 non discrimination disclaimer you can insert it. You can also provide any additional disclaimers you would like included related to the telehealth service.

## The FAQ document

Using Adobe Acrobat, open the TelehealthFAQ.pdf file

You have 3 areas that you can customize in the document as noted below

When you have entered all of your content updates, save the file for use.

### A new way to get care

#### The facts about telehealth visits

##### 1. What are telehealth visits?

Telehealth visits are video or phone visits with a doctor or clinician for non-emergency medical health. They are also called telemedicine or telehealth. We now offer telehealth visits as another convenient way for you to connect with or obtain your health.

##### 2. What type of illnesses and conditions can be treated in a telehealth visit?

Some of the most common medical conditions treated by telehealth visits are:

- |   |                                       |  |
|---|---------------------------------------|--|
| • Chronic condition management            | • Review of some lab and test results | • Symptomatology                           |
| • Follow-up care after an in-office visit | • Counseling                          | • Rash                                     |
| • Medication reviews and refills          | • Cough                               | • Request check-ups for chronic conditions |
|   | • Sore                                | • Respiratory problems                     |
|   | • Flu                                 | • Sore throat                              |

##### 3. How can my doctor treat me if I am not in the room with him/her?

Your doctor uses a number of techniques to determine a diagnosis or manage your health. Breathing is one of the most important techniques and this can be done through a telephonic or video telehealth visit. Your doctor can also observe you or another technique, and using video during a telehealth visit has the additional benefit of allowing them to see you.

##### 4. What happens if the provider can't treat my condition?

Your doctor or clinician will standby if they can assist with your condition at the beginning of the call. If they're unable to provide services, you may be directed to come into the office or seek care at an alternative location, such as an urgent care center or the emergency room. In some instances your provider may set you up with in-home care like home health, nursing visit or urgent care in the home.

##### 5. Can providers prescribe medication as part of a visit?

Yes, in most situations.\* Prescriptions are electronically sent to the pharmacy of choice as soon as the consultation is over.

##### 6. Will my health plan pay for a telehealth visit like they would if I came into the office?

Many health plans are covering telehealth visits. Please check with your plan for specifics on your benefit coverage and what medical records you need.

##### 7. How can I get more information?

Call our office at **888-888-XXXX** or visit [www.humana.com](#)

##### 8. How are services charged?

Our office bills your insurance for your telehealth visit just like we would an in-office visit. Any copays, coinsurance, or deductible amounts are due at the time of service.

##### 9. What do I need to have a telehealth visit?

There are different types of telehealth visits: some can use video while others can be conducted with a regular telephone. Please call our office and we can assist with you to see what type of telehealth visit is best for you.

\*Some states require that a doctor can only prescribe medications in certain situations and subject to certain limitations.

Many health plans are covering telehealth visits, but please check with your plan for specifics on your benefit coverage and what medical records you need.
